SUMMARY

Senior Software Engineer with 8+ years of experience in technology, working across Full Stack development, APIs, microservices, and distributed solutions with Java, Spring Boot, TypeScript, Python, Node.js, ReactJS, Kafka, and Redis. Experience in software architecture, cloud computing, Kubernetes, Terraform, AWS, GCP, Azure, observability, and AI-enabled solutions using LLMs, RAG, MCP, and AI APIs.

OBJECTIVE

To work in Software Engineering, Software Architecture, or Artificial Intelligence solutions, contributing to the development of APIs, microservices, cloud platforms, enterprise integrations, and applications based on LLMs, RAG, and MCP.

PROFESSIONAL EXPERIENCE

Dock - Spread Financial Power | 2026 - Present
Senior Software Engineer

- Work on the Pix team across MED, DICT, SPI, SPD, Scheduled Pix, Automatic Pix, MIP (Matera), QR Code Collections, Cash-in, and Cash-out.
- Develop new features using TypeScript, Clean Architecture, and Specification-Driven Development (SDD) practices with Open Spec and GitHub Spec Kit.
- Design software architecture and technical solutions for new features, defining integrations and payment flows.
- Work with AWS Cloud using SQS, DLQ, Kubernetes, CloudFormation, and AWS Lambda to develop and evolve cloud-native solutions.
- Apply strong observability practices with Datadog for log analysis, metrics, monitoring, and application diagnostics.
- Work with relational and non-relational databases supporting transactional flows and system integrations.

Banco Bradesco S.A | 2025 - 2026
Senior Software Engineer

- Developed APIs and microservices using Java, Spring Boot, and Hexagonal Architecture.
- Provided technical support to the team in solution definition, engineering best practices, and technical decision-making.
- Worked on application cloud migration to Microsoft Azure, including Azure Functions development with JavaScript/Node.js.
- Integrated applications with mainframe systems, banking services, and business-critical enterprise platforms.
- Worked with relational and non-relational databases, considering performance, security, and data consistency.
- Implemented and evolved observability, monitoring, and reliability practices using Dynatrace, Open Telemetry, Kibana, Grafana, and Prometheus.
- Developed and evolved frontend interfaces using Angular, supporting solutions integrated with APIs and BFF layers.

Mercado Livre (Mercado Libre) | 2022 - 2024
Software Developer

- Developed and evolved backend systems using Java, Python, and scalable APIs.
- Built and maintained responsive web interfaces using ReactJS, focusing on usability and performance.
- Administered and monitored Kubernetes environments through a centralized platform, supporting stability, availability, and infrastructure optimization.
- Applied SRE and Platform-as-a-Service practices, supporting development teams with operations, troubleshooting, and application evolution in cloud environments.
- Provisioned and managed infrastructure as code using Terraform across AWS and GCP environments.
- Monitored logs, metrics, and application performance using APM and observability tools including Kibana, Datadog, and New Relic.
- Worked with databases, data modeling, DDL creation, migrations, and relational schema evolution according to application needs.
- Provided technical support to development teams in troubleshooting, system improvements, incident analysis, and technology adoption.

Banco Itaú Unibanco | 2020 - 2021
Technology Engineer

- Configured, supported, and administered Silk Central and Mobile Center applications.
- Developed features, customizations, and plugins using Java to meet platform technical requirements.
- Worked with AWS and Docker, supporting components and services running in cloud infrastructure.
- Configured servers, services, and applications, ensuring availability and proper operation of the environment.
- Administered and queried Oracle databases for support, maintenance, and incident resolution.

- Provided technical support to end users and internal teams in the analysis and resolution of issues.

Cognizant Technology Solutions | 2018 - 2019
Test Automation Engineer

- Analyzed scenarios, requirements, and test models using JIRA and Silk.
- Developed web and mobile test automation using Java, JavaScript, Selenium WebDriver, Appium, JUnit, and Cucumber.
- Implemented end-to-end tests using Node.js, JavaScript, Postman, and Cypress to validate integrated web application flows.
- Applied BDD and TDD practices in the design of automated test methods and scenarios.
- Used Git, Maven, Android Studio, Eclipse, and VS Code for development, version control, and automation execution.
- Supported defect identification, analysis, and test coverage improvements for web and mobile applications.

Tech Mahindra IT Services | Feb/2018 - Nov/2018
Software Quality Assurance Tester

- Executed end-to-end test plans and cases to validate application features and system flows.
- Registered, tracked, and managed defects using ALM - Application Lifecycle Management.
- Queried, updated, and inserted data using SQL Developer to support test validation.
- Executed integrated tests in Unix environments using PuTTY and Shell Script.
- Performed high-volume testing and API validation using SOAPUI and JMeter.
- Worked with XML requests to execute, analyze, and validate integrations between systems.

EDUCATION & CERTIFICATIONS

Bachelor's degree in computer science
Universidade São Judas Tadeu (USJT) | Completed in 2023

MBA in Software Architecture
Full Cycle | Completed in 2025

MBA in Software Engineering
USP/ESALQ | In progress

Postgraduate Degree in Full Stack Development
FIAP | Completed in 2026

Postgraduate Degree in Artificial Intelligence Engineering
Faculdade Impacta Digital | In progress

Technical Diploma in Information Technology with emphasis on Systems Development
Centro Estadual de Educação Tecnológica Paula Souza | Completed in 2018

Technical Diploma in Electronics with emphasis on Electrical Engineering
Centro Estadual de Educação Tecnológica Paula Souza | Completed in 2013

Microsoft Certified: Azure Fundamentals (AZ-900)
Microsoft | Earned Nov 2025

TECHNICAL SKILLS

Backend & Architecture: Java 11+ | Spring Boot | JPA | Maven | Hexagonal Architecture | Clean Architecture | GraphQL API | Quarkus | gRPC API | Microservices | RESTful APIs | Node.js | Express.js | TypeScript | Python | Golang | Kafka | Redis | PHP | Laravel | FastAPI | Flask | Flyway | Concurrent Programming | Parallel Programming | Functional Programming.
Frontend & Mobile: ReactJS | React Native | JavaScript | TypeScript | HTML5 | CSS3 | Android Studio | Expo Go.
Cloud, DevOps & IaC: AWS | GCP | Azure | Azure Functions | AWS Lambda | SQS | DLQ | Kubernetes | Docker | Terraform | CloudFormation | Git | GitFlow | Bitbucket | IaC | OpenShift | CI/CD.
Databases & Data: SQL | NoSQL | Oracle | MySQL | MongoDB | Databricks | Data Lake.
Observability & Monitoring: Dynatrace | Open Telemetry | Grafana | Prometheus | Datadog | Kibana | OpsGenie | Power BI | Tableau | New Relic.
Artificial Intelligence: AI Engineering | LLMs | RAG | MCP | AI Agents | AI APIs | Prompt Engineering | Language Model Integration.
Quality & Test Automation: Selenium WebDriver | Appium | JUnit | Cucumber | Mockito | TDD | BDD | Capybara | Postman | SOAPUI | JMeter | End-to-End Testing | Test Automation | ALM | Silk Central | Mobile Center | Device Farm.
Systems & Tools: Mainframe | JIRA | DDD | SDD | Open Spec | GitHub Spec Kit | Scrum | Unix | Shell Script | PuTTY | IoT | Kanban | Confluence | Bamboo.

PROJECTS

Hortelan - IoT Platform for Connected Garden Monitoring
Developed an IoT solution with a web interface for monitoring soil status, battery level, water level, air humidity, temperature, soil moisture, and last irrigation, consolidating data for remote visualization and monitoring.

Web and Mobile Visual Test Automation Solution
Studied, specialized in, and presented a solution for web and mobile layout test automation using JavaScript, Java, Selenium WebDriver, JUnit, and Node.js.

Donas do Som - Sony Music Hackathon
Developed a digital platform focused on supporting women entering the music industry, built with PHP CodeIgniter, HTML5, CSS3, JavaScript, and MySQL.
